

General Dynamics Wellness Center Locker Rooms

/ Taunton, Massachusetts

Owner:
General Dynamics

Architect:
Dyer Brown Associates

Area:
1,000sf

Duration:
3 Months

Type:
Renovation

General Dynamics partnered with Erland Construction and Dyer Brown Associates to renovate 1,000sf of existing space within their Taunton office. The locker rooms that serve the company's wellness center were completely gutted and updated with all new MEP/FP systems as well as fixtures and furniture. New lockers, cubbies, partitions, showers, and countertops were installed.

The locker rooms are located on the first floor. The building remained partially occupied throughout the renovation as many employees continued to work from home due to the COVID-19 pandemic. The upgrade revitalized the space for General Dynamics' employees.

This was Erland's seventh project with General Dynamics.
