

Owner:
Metro North Corp

Architect:
DiMella Shaffer

Area:
45,000sf

Duration:
16 Months

Type:
Renovation

The Network Operations Center (NOC) – approximately 15,000sf – houses 120 workstations arranged on a 3-tiered floor. The NOC also includes a boardroom and conference rooms, as well as support areas for this 24/7 operation.

Special features include electrical switched glass (clear to opaque), "Color Kinetics" lighting, tensile stretched fabric ceilings, and a multi-million dollar A/V system.

The Customer Service Center is a series of conference rooms for presentations and marketing. It includes reception and catering areas and additional A/V equipment. Custom frosted glass doors and decorative wall panels are used throughout this area.

The Data Center spans approximately 13,000sf of raised computer room flooring with multiple racks of computer equipment for the voice and data systems associated with the NOC. In addition to office and support facilities, it includes viewing areas for customer inspections.
