

Sunrise of Newton / Newton, Massachusetts

Owner:
Sunrise Senior Living

Owner's Project Manager:
PWC Companies

Architect:
JSA Inc.

Area:
101,284sf

Duration:
16 Months

Type:
New Construction

On the site of a former car dealership, Erland teamed with PWC Companies and JSA Inc. to construct a 4-story assisted living and memory care community with underground parking for Sunrise Senior Living at the corner of Washington and Hovey Street. The existing story-and-a-half commercial building was demolished and the site was completely cleared prior to construction. The new 101,274sf Newton Corner residence is set back and surrounded by lush landscaping.

The assisted living and memory care community offers 85 suites serving up to 108 residents. Each room is designed with custom finishes for a "homelike" environment. Standard features include emergency response system, wheelchair accessible suites and common rooms, showers modified to fit all different assistance devices and hallways with assistance handrails. Some suites also include access to a balcony. Additionally, the new community features a number of amenities including a bistro, outdoor park/common area, and the option to have a pet.

This is Sunrise's third out-of-the-ground project in addition to two property refreshes with Erland.
